

Python.Markopy.BaseCLI.parse

Python.Markopy.MarkopyCLI.parse

Python.Markopy.ModelMatrix
CLI.add_arguments

```
graph LR; A[Python.Markopy.BaseCLI.parse] --> C[Python.Markopy.ModelMatrix CLI.add_arguments]; B[Python.Markopy.MarkopyCLI.parse] --> C;
```

The diagram illustrates a dependency or inheritance relationship. Two source functions, 'Python.Markopy.BaseCLI.parse' and 'Python.Markopy.MarkopyCLI.parse', are shown on the left. Arrows from both point to a single target function, 'Python.Markopy.ModelMatrix CLI.add_arguments', which is highlighted with a gray background. This suggests that both source functions rely on or inherit from the target function.
