

Python.Markopy.BaseCLI.parse

Python.Markopy.MarkopyCLI.parse

Python.Markopy.MarkopyCLI.add  
\_arguments

```
graph LR; A[Python.Markopy.BaseCLI.parse] --> C[Python.Markopy.MarkopyCLI.add_arguments]; B[Python.Markopy.MarkopyCLI.parse] --> C;
```

The diagram illustrates a method delegation or inheritance pattern. On the left, two white rectangular boxes represent the source methods: 'Python.Markopy.BaseCLI.parse' (top) and 'Python.Markopy.MarkopyCLI.parse' (bottom). On the right, a gray rectangular box represents the target method: 'Python.Markopy.MarkopyCLI.add\_arguments'. Two blue arrows point from the right side of each source box to the left side of the target box, indicating that both 'BaseCLI.parse' and 'MarkopyCLI.parse' delegate the parsing logic to 'MarkopyCLI.add\_arguments'.
