

Testing::MVP::MarkovModel
::TEST_CLASS

Markov::Node< NodeStorage
Type >::UpdateEdges

Markov::Edge::TraverseNode

```
graph LR; A[Testing::MVP::MarkovModel::TEST_CLASS] --> C[Markov::Edge::TraverseNode]; B[Markov::Node< NodeStorage Type >::UpdateEdges] --> C;
```

The diagram illustrates a relationship where two distinct entities on the left point to a single entity on the right. The top entity is 'Testing::MVP::MarkovModel::TEST_CLASS', and the bottom entity is 'Markov::Node< NodeStorage Type >::UpdateEdges'. Both point to 'Markov::Edge::TraverseNode'.
